Mwankumbi

Ihombe, Mbeya

InterAmerican
COFFEE

Cooperative Information

Country: Tanzania
Region: Ihombe, Mbeya
Farm: Lunji Estates
Altitude: 1550 - 1700 masl.

Mwankumbi started in 2016 as a cooperative of 44 smallholder farmers in the village called Ihombe. The idea was born from a cupping with friends. Neighboring farmers also brought their coffees to taste, people talked about challenges and problems, and so it came to pass that in the following weeks the cooperative was legally recognized and all other formalities were fulfilled.

The cooperative has grown in membership in recent years. We now have 161 members. In the first year, 15t Parchment coffee was collected, in 2021 it was 94t Parchment.

The coffee is processed by each member (home processed, fully washed), then delivered to the collection station on certain dates, where the quality is assessed and the coffee is weighed. The cooperative organizes the transport to the mills, the processing at the mills and the sale.

Coffees

A coffee with a lower acidity, a good sweetness and a round body. Flavors of dark berries and chocolate.

Dark Berries

Chocolate

Varieties: SL28, N39, Kent, Blue Mountain Typica,

Processing: Fully Washed
